

AmeriWater Recognized as one of Dayton's Top 100 Businesses

Awarded by The Dayton Business Journal
Top 100 Edition - 2008

With an increase of 32.7% in revenue over the past year, AmeriWater was named one of the top 100 businesses in the Dayton Ohio area.

The Dayton based company designs, manufactures, sells and services water treatment equipment for the industrial, dialysis, hospital and health care industry. They have enjoyed a steady growth for the past five years, however the past two years have really skyrocketed.

President Jim Baker and Chief Executive Officer Diane Dolan attribute the growth to doing a better job focusing on dealers and providing products that are needed in the health care industry for the 78 million aging Baby Boomers. The US, Canada and Mexico dealer network is closely monitored by AmeriWater to assure that the right dealers are chosen and properly trained. "Our dealers are our partners and very important to our continued success, but we never lose sight of the real customer...the end user" said Diane Dolan.

"My job is to constantly look for ways to improve and make things easier for our customer", stated Jim Baker. "While we are always continuing to expand, the real focus is providing a quality product that we can be proud of".

In addition to providing products, AmeriWater also does seminars, consultation, technical papers, articles and actively participates in many industry related associations. "We know that we can't sit back and wait for things to happen. It's up to us to be out there and involved" Dolan stated.

AmeriWater plans on continued growth as they expand in to new markets.
